

REMARKS

The above amendments are made to add headings to the specification, to correct the formatting of the claims, and to add an abstract. No new matter has been entered.

Applicants respectfully submit that there is no fee required for this submission, however, please charge any fee deficiency or credit any overpayment to Deposit Account No. 50-1088.

Respectfully submitted,
CLARK & BRODY

IN THE ABSTRACT

Please insert the following as the abstract.

An onshore fish farming system comprises a holding tank, which allows for intake of sea-water to the holding tank and discharge of water from the holding tank to generate a flow of water through the tank. The system also allows for collection of waste material from the bottom of the tank and removing said waste material entrained the discharge water. The holding tank is disposed with its major or longitudinal axis essentially parallel with the local shoreline, the intake water being abstracted relatively upstream and the discharge water being returned relatively downstream with respect to the or any ambient current along the shore.
